

BOMBARDIER CHALLENGER 604

Equipped with the widest possible cabin among aircraft in its category, the Challenger 604 can comfortably carry up to 12 passengers across distances of around 7,000 km. The plane is equipped with an entertainment system including DVD, individual video screens and satellite phones.

Thanks to its spacious galley located at the front of the plane, the hostess can prepare the finest dishes without disturbing passengers, before serving them at the table according to traveler's wishes. The baggage compartment located in the rear section of the cabin can be reached from both inside and outside and can accommodate several large pieces of luggage.

Its technical performances enable it to adapt to 1,700-meter long runways, which makes the Challenger 604 an extremely flexible plane suited to both short-haul and up to 8-hour flights.
